## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 10, 17, 22, 31 are indefinite because they recite "a plurality of sub-pixels" in the absence of a defined "pixel". Because the definition of pixels as relates to a screen is awkward it is recommended that the claims be amended to recite the invention in terms of areas and sub-areas or the like with the properties of the areas and sub-areas set forth. The number of pixels in an image are determined by the properties of the image forming means, such as an LCD or DMD. However, when this pixilated image is projected upon a screen the size of these discrete pixels on the screen is dependent on the magnification of the image upon the screen. The larger the projected image the larger the "pixels" of the screen. Therefore, the screen does not have definitely sized pixels by which to define sub-pixels. For this reason it is believed that the invention would be better described within the specification and the claims in terms of areas, areas within the areas or other such language.

Claim 2, 11, 18, 25-26 is also indefinite because of this ambiguity in describing the size of the pixels projected on the screen.
